

Pearson

Maximize your data analysis efforts

As data analysis and clinical endpoint questions arise, let our pharma experts help you find the answers. Our team of scientists have expertise in clinical practice, test development, and psychometric data analysis. Scientific Consultation is tailored to meet your needs.

We are here to provide unique and additional insights that your researchers need to effectively detect treatment changes.

Our experts can provide guidance on topics including:

- » COA endpoint selection
- » Data analysis
- » Growth Scale Values (GSVs)
- » Preparation for FDA submissions
- » Out-of-level testing
